

# The Lovell Lake Association Newsletter

Summer 2018

[www.lovelllakenh.org](http://www.lovelllakenh.org)

## Letter from the President

After 15 years of serving as President of the Lovell Lake Association, Tim Sherrill has decided to resign from the role and asked me to take over as President. Tim assures me that he is still very interested in the affairs of the Association and stands ready to assist me in any way possible. I'm sure that I speak for each and every member in sincerely thanking Tim for his unparalleled support, leadership and commitment to the Lovell Lake Association. As the new President, I look forward to building upon the legacy of those like Tim who have preceded me.

My wife Andrea and our extended family have enjoyed our summers on Lovell Lake since 2003, and our seven grandchildren have spent parts of each summer on the lake. As a youngster, I had the good fortune to spend some memorable and informative summer time on two particular lakes, West Hill Pond in CT, and Lake Champlain in VT. It was my hope to provide a similar experience for my children and grandchildren at Lovell Lake. When one of my granddaughters recently proclaimed that Lovell Lake was her favorite place on earth, I knew that I had succeeded.

Another memory of my youth was that I would read about the Bald Eagle, our national bird, and the Wild Turkey, the bird favored by Benjamin Franklin to be the national bird. At that time these birds were nearly non-existent in New England, and I feared I would never again see these birds in the wild. Fortunately, each species has been successfully reintroduced here in New Hampshire. Isn't it a thrill to see the magnificent Bald Eagle on Lovell Lake? My point in discussing these birds is that their absence from New England was due to man's insensitive and/or ignorant practices, and their fortuitous return was due to man's correction of those practices. Similarly, some of our neighboring lakes have become unwilling hosts for various invasive species of plants due to man's insensitive and/or ignorant practices. Unlike the suc-

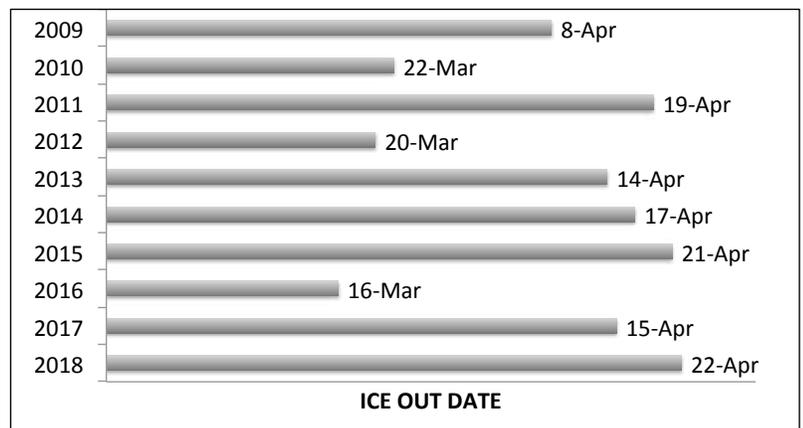

*Our new President Craig Rowley and his grandson Peter enjoying some down time at the lake*

cessful return of the eagles and turkeys, it may not be possible for those on neighboring lakes to return them to how they were before invasive species were introduced. Where we can be proactive and maintain the pristine condition of Lovell Lake is to continue to wage the battle to keep our lake free of milfoil and other invasive species. You can help by supporting Anusia Hirsch and Denise Perry in the Lake Host program, and Dick DesRoches in the Weed Watch program. Each of these programs requires the active participation of our Lovell Lake friends and neighbors, and the continued success of these programs will go a long way in assuring that your grandchildren can one day proclaim that Lovell Lake is their favorite place on earth.

Craig Rowley, President

## When the Ice is Out on Lovell Lake...

This year's ice out date was April 22nd as recorded by Tim Sherrill. Tim records the date for the newsletter every year. The chart to the left shows the last 9 years of ice out dates.

## Shoreland (Your Land) Protection Update 2018

The state and the town of Wakefield are partners in protecting the water quality in Lovell Lake and the other town water resources. The primary purpose of state legislation and the town regulations is to prevent stormwater runoff from reaching and polluting the lake.

For the past decade, the zoning regulations of the town have included the requirements of the State's Shoreland Protection legislation, which is the Shoreland Water Quality Protection Act (SWQPA). Now the town has taken on a more active role in the enforcement of the SWQPA. The State regulations require a permit for most construction activities undertaken in the shoreland zone, which includes all land within 250 feet of the high water mark.

The SWQPA states "the shorelands of the state are among its most valuable and fragile natural resources and their protection is essential to maintain the integrity of public waters. The public waters of

New Hampshire are valuable resources held in trust by the state. The state has an interest in protecting those waters and has the jurisdiction to control the use of the public waters and the adjacent shoreland for the greatest public benefit."

As of July 2017, the town also requires a permit for construction activities in the R2 Zone, which includes all land within 500 feet of the high water mark on all lakes and ponds. The town permit costs \$25 and can be obtained at the Land Use Office in Town Hall. The town is empowered to enforce the State permit requirements and plays an active role in making sure the intent of the SWQPA is carried out, that of protecting water quality in our lake. If you need a state permit for construction, you will also need a town permit. You'll need a town permit for construction between 250 to 500 feet from the lake.

There are simple do's and don'ts that will ensure that we are not part of the pollution problem. We have an expert available to help us get the job done AND protect the Lake. Don't get into problems after the fact, call before you dig or build!

For more information, visit or call the Land Use office (on the ground floor of Town Hall) to determine if your work will require a state and/or a town permit and get advice on how best to proceed. You can also call and talk to Victor Vinagro (Wakefield's Shoreland Protection Officer) at 603-522-6205, extension 308.

## Water Quality Update 2018 *BE PART OF THE SOLUTION*

Each year we report on the state of the lake's water quality. It's easy to ignore these yearly reports since no one year produces drastic changes. Changes in water quality slowly creep over time, and in the case of Lovell Lake it is still moving in the wrong direction. Water quality in a lake looks good until it

hits a tipping point and then it's bad and getting worse. The enclosed Water Quality Report shows the water quality in Lovell Lake is still headed downhill, as seen by the increasing amount of phosphorus. As phosphorus increases so also do weeds and algae, resulting in a loss of water clarity, heavy weed growth, and a downward trend for property values. The data from 2017 confirms the model with phosphorus over 8 parts.

The primary cause of the increasing phosphorus is polluted runoff reaching the lake. So what is the future for Lovell Lake? Does the next generation get to enjoy the lake the same way we have? That's up to all of us, the future is in our own hands. The good news is that correcting the negative trend now is cheap. The bad news is that fixing the problem after we go over the edge is infinitely more costly and may not be possible.

All of our properties drain into the lake and affect the water quality. When rain hits the ground and snow and ice melts, the resulting water either goes into the ground or runs over the ground and into the lake. Runoff picks up pollutants such as common soil and sand, fertilizers, pesticides, manure, and petroleum products and deposits them into the lake. To protect the lake, all of the runoff should be soaked up by the ground, with none of it reaching the lake. When water penetrates the ground, pollutants are filtered out and don't get into the lake water.

*What are the common conditions that cause this pollution to reach the lake, carried by runoff?*

- Lakeside beaches that allow sand to wash into the lake
- Lawns with no lakeside buffer
- Adding fertilizer to lawns and gardens
- Failed septic systems
- Bare soil areas where runoff picks up soil
- Straight paths that act as a channel for runoff to reach the lake
- Lots cleared of vegetation along the water
- Lots largely covered with impervious materials where water has no place to penetrate the ground
- Steeply sloped roads and drives that collect and channel water to the lake

If your lot has any of these features, your land is part of the problem and needs to be corrected. Luckily, easy inexpensive solutions are available, as well as the technical support needed to make them happen. Simple corrective measures such as rain gardens, buffer strips, infiltration steps, plunge pits and rip-rap trenches solve most problems. They will also beautify your property and can usually be completed with hand tools at low cost.

You can get started with a simple phone call to Acton Wakefield Watersheds Alliance. Call or email Amy Arsenault, Program Manager at 603-473-2500 or amyarsenault@watersheds.org.

***DON'T BE PART OF THE PROBLEM  
BE PART OF THE SOLUTION***

## Lake Host Program

Invasive aquatic species of plants and animals continue to plague New Hampshire lakes, yet Lovell Lake is still un-infested and remains clear and pristine for everyone to enjoy. One major reason for this is the Lake Host program, under which boats are inspected for invasive plants before entering the Lovell Lake at the public launch. The 2018 Lake Host Season officially begins on Saturday, May 26th, and the ramp will be staffed on weekends from 9am – 5pm throughout June. Beginning on June 30th, staffing will increase to 7 days a week from 7am – 7pm. This year we would like to welcome Denise Perry who has been hired as our Lake Host Manager. She will be scheduling and supervising our six lake hosts and taking care of most of the administrative duties required by New Hampshire Lakes Association.

Unfortunately, this year we have lost the generous funding by our “anonymous” donor. We have enough money to cover the 2018 season, as we’ve accumulated some unused funds over the past few years. However, we will need additional funding for 2019. Also, after 16 years this will also be my final year as the Lake Host Point Person. New Hampshire Lakes requires a volunteer from every lake participating in the Lake Host program, **so someone from Lovell Lake needs to come forward and volunteer to take over the position.** Information about the program and the Point Person position can be found on <https://nhlakes.org/education/lake-host/>.

Please stop by the ramp and say hello to our Lake Hosts who work very hard to protect Lovell Lake. Volunteers are also needed during the month of June when our ramp coverage is limited to Saturday and Sunday. Choose a day and time that works for you and know you are helping to protect Lovell Lake and our property values.

Looking forward to the summer on our beautiful lake. If you have any questions about the Lake Host program, don't hesitate to contact me (Anusia Hirsch) at 781-771-4046 or [hirsch.anusia@gmail.com](mailto:hirsch.anusia@gmail.com).

Ed. Note: *Many thanks* to Anusia for the phenomenal job she has done leading the Lake Host program over so many years!

## VOLUNTEERS VOLUNTEERS

There are many reasons why people like you volunteer for causes and work on issues. You might:

- Believe strongly in a cause or issue, and want to make sure it is addressed or advanced,
- Feel that no one else is stepping up, so it has to be you who gets involved so you don't feel guilty that others are doing your job,
- Want to protect either your financial interest or the ability to use a high-quality resource in the future

Do any or all of the above apply to you? If so, Lovell Lake needs you and your family to step up and do your part by investing one hour a month to protect the lake and the investment in your property. Materials and training are provided to make things easy for you. Contact Dick DesRoches for details at 603-473-2216 or [dickdesroches@yahoo.com](mailto:dickdesroches@yahoo.com).

## Acton Wakefield Watersheds Alliance 2018

Meet Amy Arsenault, Program Manager for the Acton Wakefield Watersheds Alliance. Amy is responsible for many of the AWWA programs in Wakefield and Acton, including:

- Organizing and overseeing construction on Youth Conservation Corps (YCC) projects
- Developing water-related educational programs for Wakefield and Acton elementary schools. The mission of the program is to create and foster a love and protection for our water resources
  - Recruiting, training and supporting volunteer educators for school programs
  - Delivering the hands-on programs in the classroom
  - Providing technical support for landowners around the lakes and ponds to eliminate runoff and pollution
  - Creating site-specific landscape designs using accepted Best Management Practices (BMPs) for homeowners participating in AWWA's technical assistance program
  - Following up on the designs to support effective completion
- Publicizing AWWA programs to towns and landowners through outreach materials, press releases, direct communication, lake association outreach, and signage
- Maintaining and updating the AWWA website

*What's going on with AWWA in Spring 2018 and what can we expect for the rest of the year?*

- Youth Conservation Corps (YCC)
  - We are currently recruiting new YCC projects, starting with a technical assistance visit before becoming eligible to access free labor through the YCC crew
  - Recruiting and hiring the YCC crew and leadership
  - We are expecting to have 4 – 6 crew members
  - Typically the crew completes 15 – 20 projects each summer
  - The YCC season starts June 25th and ends August 17th
  - We are hoping to do more projects on Lovell Lake than the three we completed in 2017
  - If you see the YCC working, feel free to stop and check out the project, or ask questions
  - Call or email Amy Arsenault to get into the YCC program at 603-473-2500 or [amyarsenault@watersheds.org](mailto:amyarsenault@watersheds.org)
- Website-a great resource for homeowners looking for local water related information (<https://awwatersheds.org/>)
  - Information and background on AWWA's mission, personnel, and volunteers
  - AWWA's programs: YCC, Technical assistance, School programming, Cyanobacteria program, Water quality monitoring, Conservation practices for homeowners
  - What you can do on your own property to make it more lake friendly

(Con't from page 3)

What's the most important thing Lovell Lakers should know about AWWA? AWWA is the year-round local expert on the lakes and ponds of Wakefield. We are here to help property owners help themselves to become a part of the solution to the water quality issues that threaten your lake. Contact us at 603-473-2500 or amyarsenault@watersheds.org.

## Lovell Lake Association Scholarship 2018

The Lovell Lake Association is pleased to announce the winner of this year's scholarship, Jillian Currier of Sanbornville. She was a member of the National Honor Society during her senior year at Spaulding High School, and her class rank is tenth out of 275 students. She has participated in many extracurricular activities at Spaulding including the Interact Club and the Swim team. She also volunteered at the Monarch School where she assisted mentally and physically challenged high school students. She has received the Rotary Youth Leadership Award and Academic Excellence Awards in English and Biology. During the summer of 2016 Jillian completed missionary work in Zimbabwe for three weeks with her church youth group. Congratulations, Jillian!

## Summer Gafney Library News

Phone: 603-522-9735 Website: [www.gafneylibrary.org](http://www.gafneylibrary.org)

The Gafney Library has the latest in fiction and nonfiction, available in book, audiobook, or ebook. You can check the library catalog and use your account to reserve items, they can be ready for pickup when you open your summer home! The Gafney also has DVDs you can check out, including many Oscar-nominated movies, documentaries, and other movies and TV shows. The annual Art at the Gafney has been newly reorganized for this year, with over 50 artists exhibiting two items apiece: one for show and one for raffle. Over the next two months you can view the work of local artists and teach your children, grandchildren, nieces/nephews, or neighbors an appreciation of art. Great on a rainy day! Art events for children are also being incorporated into the event, so stay tuned at [gafneylibrary.org](http://gafneylibrary.org). The Gafney expansion plans are moving into the next phase. During the summer months we will be working with architects and consultants to finalize the building and program parameters for the New Gafney.

Having trouble with college math? Need high school certification? Need to brush up on computer skills, or improve reading/writing/math skills? The Gafney Library Adult Learning Center is open on Wednesdays as a drop-in opportunity between 3:00 and 7:00pm. We are available and pride ourselves on addressing any adult learning need you might have - challenge us!

### SUMMER PROGRAMS

Here's a partial list of the many summer activities for kids of all ages available at the Gafney Youth Library.

**Music Together** – Ages 1-5 years, held on the 4th Friday of the month (June 22, July 27, and August 24), 10:15-10:45 AM. The connection between music, movement and language through songs,

rhymes and instruments will be explored.

**Storytime Jamboree** – Ages 2-5 years, held the 1st and 3rd Fridays of the month (June 1 and 15, July 6 and 20, August 3 and 17), 10:15-10:45 AM. This program introduces young children to books, reading and language with stories, songs and activities.

**LEGO Club** – Geared to school age but open to all ages, held on the 3rd Tuesday of the month, 4:15-5:15 PM. We'll provide the LEGOs and you provide the imagination.

Other activities include the Mad Scientists Club, Art for You, Craft Time, Game Time and Makespace. Check the library website ([www.gafneylibrary.org](http://www.gafneylibrary.org)) for dates and times.

### SPECIAL EVENTS

**Summer reading program** – “Libraries Rock” June 26 through August 4. Registration begins on June 19th.

**Raising Rabbits** – All ages, June 30 at 10-11AM on the back lawn. Learn about rabbits from a Wakefield breeder and see the many different types.

**“Treasure Island”** – performed by the Hampstead Stage Company – All ages, July 14 at 10AM at the Wakefield Opera House. This is a tale of pirates, adventure and buried treasure. This event is open free to the public and is funded by the Friends of the Wakefield Libraries.

**“Let's Rock”** – All ages, July 21, 10-11AM. Rock and mineral program. Rockhound Crystal Linder will share her knowledge and extensive collection of rocks and minerals in this fun and informative program.

### AND FOR THE TEENS

**Teen Advisory Board** – 1st and 3rd Tuesdays of the month, 5:30-6:30PM. June 5 and 19, July 3 and 17, August 7 and 21.

**Duct Tape Bracelet Craft** – Grades 7 thru 12, July 17, 5:30-6:30

### Obituaries

**Buck Howe**, 73, died May 25, 2017, as the result of injuries sustained in a car accident. He was the husband of Ann Gouvalaris Howe of Amherst and son of the late Philip and Mary Howe of Hampton. For the last 33 years, he called Amherst his home but his heart always resided at “Camp” on Lovell Lake in Sanbornville. His family has had a cottage on the lake since 1929. During his early years, Buck was a newspaper reporter and editor on the NH Seacoast. As a freelance photographer, Buck worked for a variety of Fortune 100 companies and had a photo published in Life magazine. He later transitioned to high tech marketing and public relations for the Digital Equipment Corporation and other well-known companies. Professionally, he was most proud of his 10+ years as an adjunct professor of business at the University of New Hampshire (Whittemore School of Business and Economics and the Peter T. Paul College of Business and Economics). He retired in 2017. His affection for Lovell Lake had no bounds. For many years, he competed enthusiastically in the Sunfish sailboat races. His fishing prowess was well-known and he was a familiar figure trolling on the lake in his pontoon boat and taking photos of the wildlife and scenery. He authored a children's book, *The Adventures of Louie the Little Loon of Lovell Lake*, that included his photos of loon parents raising their chick. Besides his wife, Buck is

## Treasury Notes

Last year we had another very successful year financially to fund the programs implemented to protect our lake from invasive plants and animals and monitoring the quality of the water. For years our organization has received some assistance from the Town of Wakefield, a small grant from the state of New Hampshire managed by the NH Lakes Association, and a unanimous grant for our lake host program again managed through the NH Lakes Association. For 2018, We expect the Town of Wakefield will continue to support our lake host program at the same level as last year. The grant from the state have dropped in recent years as more communities implement lake host programs. And finally, our unanimous grant has gone away.

### Our Preventative Programs:

- Lake Host Program – We pay lake host trained individuals to inspect boats to prevent exotic plants and animals from ever entering our pristine lake. Last year we started paying a point person to oversee their daily activities. For a long time, Anusia Hirsch has managed this entire program as a volunteer. Starting this year, we will hire a person to manage the lake host program. Between the loss of the unanimous grant (\$5,200) and adding paid positions to manage the lake host program, our expected cost for 2018 will increase over \$6,500.
- Water Quality & Weed Watch – We ended last year discussing expanding our water quality program from seasonal to a year-round effort and increasing the scope of the testing. I expect we will increase the scope of this program and continue to look for ways to protect our lake.

### General Fund

The \$3,100 budget pays for the Lovell Lake Newsletter and

annual decal, insurance, PO Box rent and postage, the annual meeting and the boat parade.

### Other Programs We Support

- Bob Tucker Memorial Scholarship – Given annually to college bound area residents and children/grandchildren of our members. The \$750 scholarship is funded only from donations specifically identified for the scholarships.
- New Hampshire Lake Association – We are a member of this association, which helps with the We are a member of the association. They help with the administrative functions needed for our Lake Host Program and support legislative efforts in New Hampshire. We budget Dues of \$300 per year.
- Loon Preservation Committee – We make annual donations to the committee and support their efforts preserving our Loon population.

### We are Financially Sound

We live within our budget that is set each year. We are able to pay our bills even though most are payable before the annual dues are due. We continue to keep our annual dues at only \$25. We are able to make annual contributions to our Exotic Plant and Animal War Chest, so we will be able to react immediately if the need arises. We are able to do all this because of the generous donations made by our members, community and town. All of our officers are volunteers. Please thank those on the Donor List for their generous donations. Your donations do make a difference.

Now more than ever, it is important that every resident on the lake become a member. Please encourage your non-member neighbors to join.

Best Regards, Alan Heacock Cell (603)714-0250  
Lovell.Lake.Treasurer@gmail.com Fax (603)471-3126

---

*(Obituaries continued from page 4)*

survived by his son, Philip T. Howe of Davenport, FL; a sister-in-law, Maria White of Merrimack; a nephew, Matthew Bland of Germantown, MD; and cousins scattered throughout the country. A tax-deductible donation in Buck's memory may be made to the Lovell Lake Association, PO Box 232, Sanbornville, NH.

**Terry A. Martell**, 71, of Brackett Road in Sanbornville, NH, died Dec. 18, 2017. Born Jan. 22, 1946, in Saco, son of Henry and Christine (Hasty) Martell, he grew up in Limerick, Maine. Terry proudly served in the U. S. Navy, aboard the U.S.S. Constellation CVA-64, as a Boiler Repair Foreman. Terry met his future wife, Irene Morin, while on leave in 1965, Labor Day weekend at Old Orchard Beach. They were married on Oct. 28, 1967. They just celebrated 50 years of marriage. A true entrepreneur, he began Main Street Sales, Sunshine Acres Campground, and M&M Boat Storage. Terry was a generous man who gave of himself to his family, community, and friends. Survived by his beloved wife of 50 years: Irene T. Martell of Sanbornville, NH and their 2 daughters: Tammy Martell-Welsh and her husband, Douglas Welsh, of Portland, Maine, and his grandchildren: Robert and Caris Welsh. Predeceased by his el-

dest grandson Ian Welsh. Bonnie (Martell) Cyr and her husband, Jonathan Cyr, of Sanbornville, NH, and his grandchildren: Olivia Ricard, Hayden & Clayton Cyr along with great grandson, Odin Ricard. Three siblings: Charles Martell, Sharon Reed, Cindy Wetherell, many cousins, nieces, and nephews.

**Albert Gatto**, 86, passed away on March, 7, 2018. Born in Boston Massachusetts, and raised in Medford, Al settled in Connecticut after serving 4 years in the United States Air Force. He became interested in the Wakefield area after spending time here with childhood friends. In 1966, Al bought a small camp in the cove behind Sandy Island that remains in the family to this day. An avid sailor, you could find him on any given weekend out in the middle of the sailing regatta. Retiring from Pratt & Whitney after 35 years, he enjoyed travelling, wood working, playing golf, and following the Redsox and Bruins. He was a past president of the Lovell Lake Association. He is survived by his wife of 38 years, Joan; 2 brothers: Arnold and John, 1 sister: MaryAnne; 6 children: Ken Gatto, Andrea Young, Cindy Meloling, Chris Gatto, Franklin Davis, and Sherry Carlson, 9 grandchildren, and 1 great-grandchild.
